Russia, from sovereign empire to globalist proxy state

Abstract

On behalf of the 500-year-old Glafia crime syndicate for world domination, Russia and China have since long been prepared to take the baton over from the USA, as hegemonic leaders of the next version of a unipolar world order.

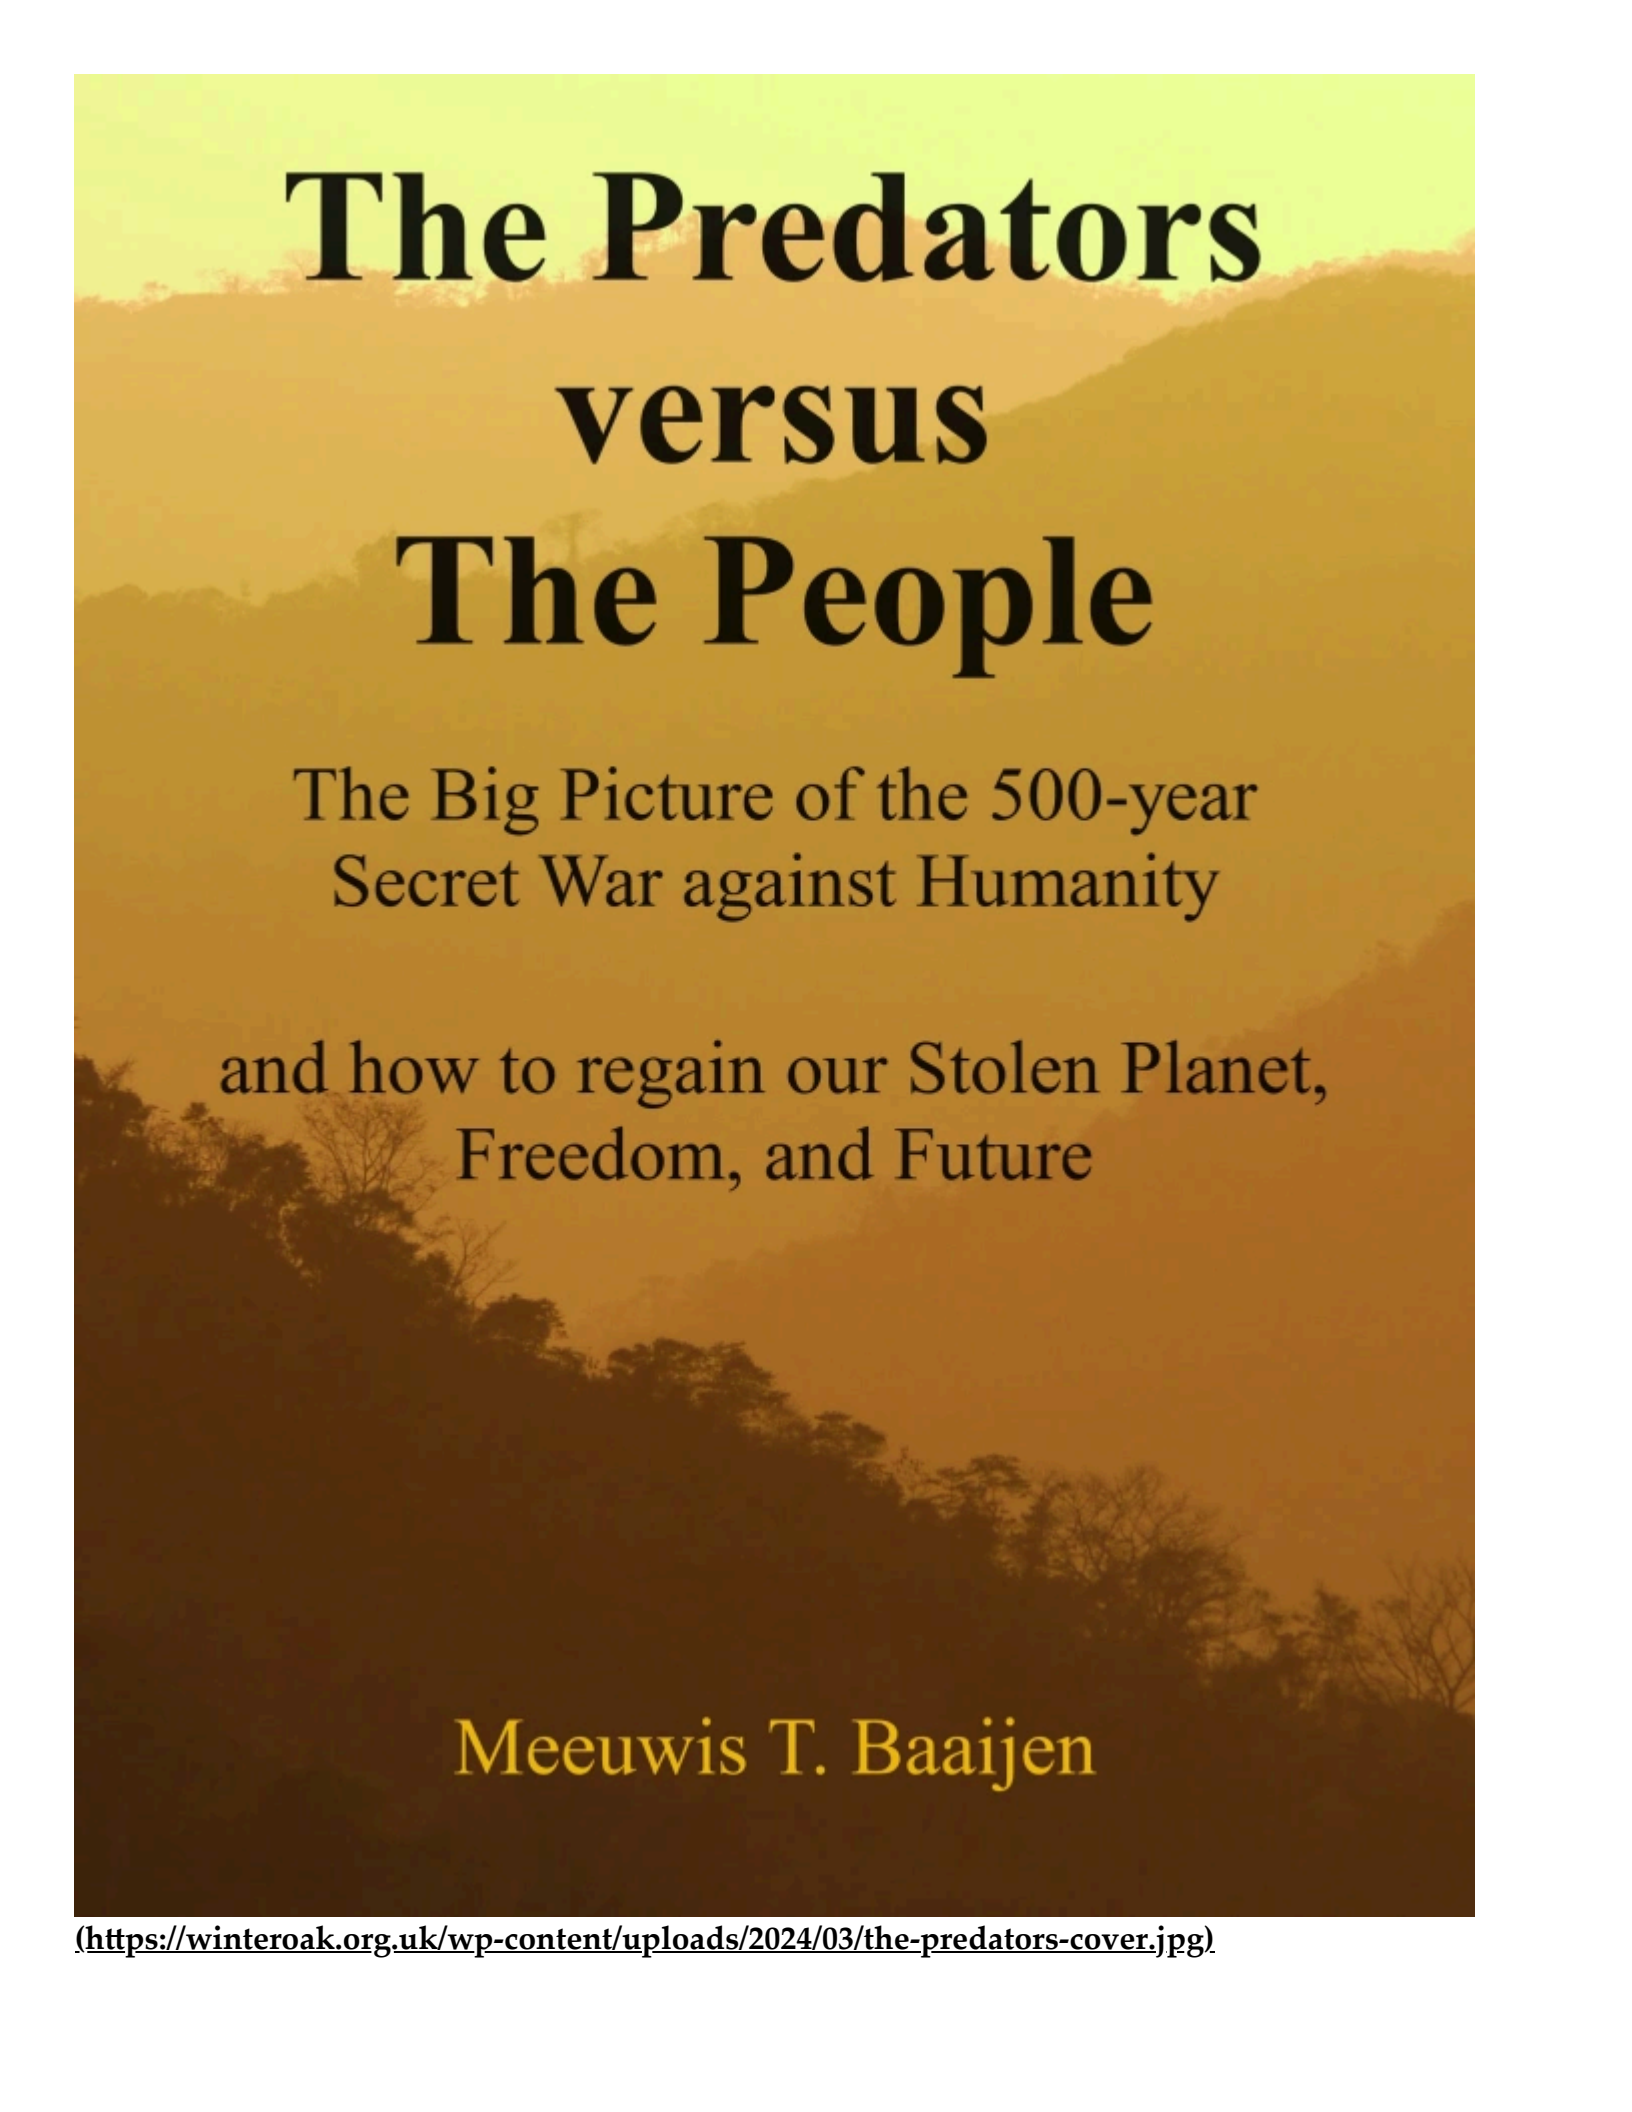

This latest – and fourth – change of cycle in Glafia's global project is promoted under the shiny but false brand of a benevolent multipolar world order which respects the sovereignty of countries – which are however all governed by Glafia's proxies.

This propaganda effort also includes the fake ending of the globalist project, due to soon to be expected actions of the brave, new “traditionalist” heroes on the world scene: “Taoist” China and “Orthodox” Russia.

Introduction

This article series is a follow up of my book *The Predators versus The People* and my recent article *The United States of America: from fake dream to real nightmare*. There you can read how the USA was captured, and probably created, to become the fourth hegemonic power controlling the world's nation states on behalf of the secret 500-year global domination project led by the Predators, or Glafia.

That's a crime syndicate of a few hundred dynastic, extremely rich (up to trillions of dollars) and tightly knit families, not bound to any country, religion or ethnicity. The earlier hegemonic cycles were carried out by Spain (15th/16th century), Holland (17th century) and England (18th/19th century).

The Predators versus The People

The Big Picture of the 500-year
Secret War against Humanity

and how to regain our Stolen Planet,
Freedom, and Future

Meeuwis T. Baaijen

Together with Glafia's British and Zionist proxies, the USA prepared and instigated *The Great 20th Century Slaughter of Eurasia*, with over 200 million deaths: The World Wars including Nazism and Hitler, the communist revolutions in Russia, China and elsewhere, the Cold War, as well as their covert cultural, educational, scientific, financial and spiritual wars against humanity.

The USA also installed puppet regimes in all "newly independent" ex-European colonies in Africa and Asia, created after World War 2 by the Glafia-planned fake de-colonization program. The countries of Latin America, colonized much earlier by Spain and Portugal, had already been "freed" in the early 19th century, to become permanent vassal states of Glafia's British, and later American hegemon.

Besides the control of ALL LANDS, an important task of the USA was to pioneer the development of advanced technology for the permanent surveillance of ALL PEOPLE, as announced by Zbigniew Brzezinski in 1970, in his book *Between the Two Ages*: now often called the Global Digital Prison (with CBDC, UBI, 5G, carbon credits, etc.). This project is presently being implemented on a global scale, based on the model that has been rolled out in Communist China.

With the completion of these tasks, the American proxy state is no longer needed as Glafia's hegemonic leader, and it's now being scapegoated and demolished, together with the rest of the West. In the meanwhile, China, assisted by Russia – with a much larger population and economic/industrial potential than the USA – is taking over.

Glafia's preparation of Russia

After the defeat of Glafia pawn Napoleon in 1815, Russia was the strongest nation on the European continent. Russia was well aware of the Rothschild plan to bring Europe under Glafia control – under the cover of *The Concert of Nations* – via the installation of usurious central banks and fake democracies, covertly steered by bribed and corrupted, subordinate national “elites”. It tried to counter this early attempt at world control through the *Holy Alliance* it made with the monarchies of Austria and Prussia, which was renewed under Bismarck in 1871.

Yet the Rothschilds managed to become key backers of this Alliance. They also got heavily involved in Russian railways and oil industry. Niall Ferguson writes: “Of all great powers, Russia relied most heavily on foreign lending in the period before 1914”. Russia was quickly modernizing and improving the conditions of its population, and the possibility of a popular revolution became more and more remote.

Such was Tsar Nicholas II trust in the Rothschilds that he deposited a large part of his enormous fortune in their banks. After the ritual killing of his complete Romanov family in 1917, no heirs survived to claim it. That crime was carried under the cloak of the Bolshevik Revolution. Just as the French Revolution, it wasn’t a grassroots movement, but Glafia’s secret and lavishly financed instrument to gain full control of Russia (Antony C. Sutton; Docherty and MacGregor), in which tens of millions would find a horrible death.

The awful and bloody Communist experiment that followed – the Soviet Union – built up with American military and civilian technology (Antony C. Sutton), served Glafia’s plan for the 20th century conquest of Eurasia well:

And Communism, Glafia’s preferred population control system, was also used as a subversive force to undermine the West (Y. Bezmenov).

- Russia was an important power to assist in the planned destruction of Germany. Yet, from the 1922 Russo-German Rapallo Treaty until the day before Hitler’s Operation Barbarossa against the USSR in 1941, the Soviet Union – like the USA – assisted in the build-up of its future enemy (G. Preparata). It’s a pity that Putin forgot to mention this to Tucker Carlson!
- It was also a precursor, with many lessons learned, for the later *communist takeover* under Mao in China, enabled by Glafia’s American hegemon – and now of the whole world, as promoted by the WEF (“You’ll own nothing and be happy”).
- The Soviet Union was the perfect source for a *strategy of fear* in Glafia’s protection rackets: Communism as bogeyman in the Cold War, in the fake de-colonization process and in the build-up of the European Union (based on the Soviet model, V. Bukovsky).
- With Russia in the “communist fridge”, and later China too, both were neutralized as economic competitors, thus paving the way for the meteoric global career of Glafia’s American hegemon, the “free and democratic” USA.

(<https://winteroak.org.uk/wp-content/uploads/2024/03/soviet-buildings.jpg>)

However, their initial *merger plan* for the Soviet Union and the USA (Norman Dodd, Rice Committee) failed. Yet in 1959, Soviet leader Nikita Khrushchev pounded his shoe on the United Nations lectern and shouted:

“Your children’s children will live under Communism. You Americans are so gullible. We won’t have to fight you; we’ll weaken your economy, until you fall like overripe fruit into our hands.”

The now weakened and brainwashed West seems to accept the newest “stakeholder communist” proposal, the WEF’s *Great Reset*, where you will own nothing, and have no freedom, and no human future (Schwab & Harari).

The apparent failure of the communist/capitalist merger plan, Glafia’s decision to go East for its fifth cycle, and the birth of the Global Digital Prison plan made the Soviet experiment obsolete: Glafia had its pawn Gorbatsjev finishing it off in 1991.

ⁱSoon thereafter, Glafia’s CIA agent Fidel Castro said: “*The next war in Europe will be between Russia and Fascism, except that Fascism will be called Democracy.*” No prophesy, just insider information, on a purposeless – for humanity, not for the war profiteers – and banal war which is now a very sad reality in the Ukraine.

After 1991, Russia was first opened to capitalism via shock therapy, ending in planned disaster and looting – by “Team Harvard” as destroyer, starring leftist Jeffrey Sachs, now working hard to restore his tarred reputation. This operation was planned years ahead of the Fall of the Berlin Wall: Glafia’s Western and Israeli banks gave large credits to selected future oligarchs (M. Wolski: 75 % of them Jewish and

linked to Chabad, a trusted Glafia proxy), so the international bank owners – the richest families in the world – could buy up the enormous wealth of the Russian nation on the cheap, while leaving its population in ruin. About 30,000 Russian's were murdered during this operation by the Russian Mafia (another Glafia proxy), and male life expectancy at birth fell six years. i

[content/uploads/2022/04/putin-and-kissinger.png](https://winteroak.org.uk/wp-content/uploads/2022/04/putin-and-kissinger.png))

At the depth of the Russian crisis, the able ex-KGB agent Vladimir Putin – who had been selected and mentored early on by Glafia agent Henry Kissinger and was then trained as Young Global Leader by the WEF (from Klaus Schwab's horse mouth, see references) – was made the front man for the Glafia-subordinate Russian oligarchs and globalist bankers. With his Chabad handler Rabbi Berel Lazar (in Russia since 1990), he then "saved Russia". That and his reaction to the false-flag flat bombings made gangster Putin very popular with the Russians (*Putin's False Flag* (<https://iaindavis.com/putins-false-flag/>), Iain Davis).

Mentor Kissinger surely told Putin long ago that a strong Russia was needed for Glafia's West-East shift, and that the war predicted by Castro would be the price for his and Russia's meteoric career. Just as Bismarck's handler Bleichröder, a Rothschild-associated banker, had told him that war would be the price Germany had to pay for its Glafia-financed unification project in the 19th century (Nicolai Starikov).

When Covid was launched in 2020, "autonomous" Russia under Putin obediently followed the globalist WHO script and vaccinated a large part of its population with the toxic AstraZeneca jabs, now retracted. Idem, its Central Bank is fully in line with Glafia's BIS bank in Basel (including the CBDC project), while Russia's policies are also totally in cahoots with the traitorous UN/WEF alliance and their 2030 "sustainability" agenda, climate scam, insect food, Great Reset and Fourth Industrial Revolution.

The war in Ukraine

Hannah Arendt, deeply impressed by the many revelations (Zionist atrocities included) during the Eichmann process (1961) in Jerusalem, spoke of the *banality of evil*. The present war in the Ukraine is a case in point. You may call me cynical, but this is what I concluded two years ago, and I think it's still valid:

“The Western “elites” know that the East will irrevocably take the baton over (see Macron’s 2019 words on *the end of Western hegemony*). But before that, both parties (both Glafia proxies!) agreed on a bloody theater war to dump their old hardware, test their new weapons, train their armies (Russia) and fill their pockets and vaults to the brim”.

Russia’s recent generation of hypersonic missiles play a key role in this conflict: according to Scott Ritter, the US – now allegedly years behind in military technology, a very strange situation – is already in checkmate, and so is Israel: The West simply can’t defend itself against the Eastern hypersonic missiles. And while Russia shares this technology apparently with China and Iran, the US seems unable to bridge the gap.

The corrupted Russian Orthodox Church is in full collaboration with Glafia’s Russian oligarchs and their frontman Putin. Since the war in Ukraine, it leads an “Orthodox Jihad” (a term by Derk Sauer) in which its priests bless the soldiers going to the war front in Ukraine. Instead of claiming a peaceful solution, the Church supports the war and betrays these poor boys, promising them a passage to heaven when they die for the “noble aims of the motherland”.

([https://winteroak.org.uk/wp-](https://winteroak.org.uk/wp-content/uploads/2023/09/dugin.png)

[content/uploads/2023/09/dugin.png](https://winteroak.org.uk/wp-content/uploads/2023/09/dugin.png)).

Another important role in the official Kremlin narrative is played by Putin’s “brain”, “traditionalist philosopher” Alexandr Dugin, an admirer of Lenin and Stalin who in 2014 called for Russians to “kill, kill, kill” Ukrainians. His reaction to Covid was telling: he kept silent and started wearing a mask (Iurie Rosca). He has been unmasked in Paul Cudenec’s article ‘**Alexandr Dugin: a Globalist Pawn**’ (<https://winteroak.org.uk/2023/10/24/alexandr-dugin-a-globalist-pawn/>).

The strong popular support for Putin is based on exactly the same pervasive deceit by the official media as in the West: in both, the majority still hails the politicians who were responsible for the disastrous Covid policies. As Oswald Spengler wrote a century ago: “The mass media are the means through which money operates democracy”.

The strange stance of many anti-globalists on Putin and Russia

Like most countries (including all Western states), today’s Russia is only nominally a democracy: the real power behind the official facade is secretly and firmly in the hands of Glafia, via its Russian/Jewish proxies. Any opposition endangering their interests is ruthlessly dealt with by silencing, banning, imprisoning or killing the dissidents (Iurie Rosca).

In Russia, the *fusion between the state and capital*, the old Glafia model described decades ago by the famous French historian Fernand Braudel (who was also the first to use the term *Predators*), is now obvious, as it was during Communism. “All the world’s a stage”, as Shakespeare wrote. And for over a century, Russia has been one of the many nation states on Lord Curzon’s chessboard, “where the great game for world domination is being played out”, by the one player behind it: Glafia.

Surprisingly, most of the anti-globalist leaders in the West, while piercing and criticizing the propaganda of their own governments, take Putin and the Kremlin’s relentless propaganda completely at face value. Reasons for this strange phenomenon could be:

- Wishful thinking or clinging to a false hope (“Russia as the last bastion against the globalists”).
- Influencing and bribing by Russian secret services (very common in the Soviet era, and it certainly happens now too).
- An honest attempt to correct the loud blackwashing of Russia by Western politicians and mainstream press (which is of course part of the banal and genocidal “professional wrestling deal” in Ukraine which the Western and Russian gangsters made).

And last but not least, the root cause is the generalized ignorance about Russia’s real history, which will hopefully be lessened by the present article.

Private Central Banking is the global mafia’s foundation for dominance over the former “Nations” of the world, now converted into Corporations that may be found on Dun & Bradstreet.

These Corporations, masquerading as “Nations”, stand under Unidroit international Commercial code & statutes.

The People, born on the Land, have also been fraudulently converted into corporate legal-fictions for the purpose of “securing” the national debt, changing their jurisdiction without full disclosure and informed consent.

Thanks for this. There’s so much history I’ve yet to learn. I’m just presuming the psychos own everything and trying to hang onto the future.

Question: I’m sure there are reasons why this is not possible but I want to know at this point in flattened time why we can’t just create a new digital ledger somewhere and give everyone-but-the-predator-class money so they can start buying, and starve them out that way? It sounds so dumb asking this but the problem is economics is so excruciatingly boring to me and dead that I can just never bring myself to learn enough about it (except for Sacred Economics by Charles Eisenstein to answer my own question 😊)

Thoughts?

With some good points here and there, this article draws a very simplistic picture of the world today, giving Russia way too much credit in this game than it deserves. The fake state of the so-called Russian Federation cannot in any way be analyzed and approached with the same mindset and toolset as the long-gone Russian Empire and even the USSR. Russian Federation a country held hostage by both its imperialistic chauvinistic past and greedy mafia-style Mammon serving elite's interests is in fact the true "fascist state called democracy", with Mr. Dugin's so-called philosophy is being nothing but fascist nationalistic rants. Meanwhile real "Russia" is represented in this conflict by Ukraine (or the original Kievan Rus, which name was later apprehended by the Dutchy of Moscovia). In the end of the day the logical outcome of the events unfolding today would be the final deconstruction of the Tsardom of Moscovia which had been rebranded as Russian Empire, then after the latter's fall reconstructed as the USSR and finally its third iteration Russian Federation. One thing undeniable here is that both USSR and Russian Federation would not have existed if not for the active financial and technological support from the USA's elites, who had numerous chances to deal away with Moscow regime in the 20th century, but always opted to keep it as joker down the sleeve and a bogeyman. Today however we see a different picture. The world powers have finally made a decision to throw Moscow under the bus. They just don't want to risk any abrupt setbacks and boil the frog slowly. As with Nazi Germany divided after the WWII what we are going to witness sooner or later is partition of Moscow tsardom in at least three zones of influence: Siberia and Far East influenced by China, West part influenced by European countries, south and Caucasus influenced by Turkey. Thus EU, Turkey and China will fulfill the project of Belt and Road without any interference from unpredictable muscovites, which in turn will in the end of the day strengthen the position of China on the Eurasian and African continent making it the number one power in the region and arguably in the world, bringing in the fourth version of the world order backed by the elites as the article rightfully points out. Russia however is not a partner of China in this game, this time it will not be saved anymore.

Thanks for your comment Alexander.

This article necessarily is limited to a small fraction of the Big Picture which I describe in my book. See also my previous article on the USA.

In the next article on China I will explain that Russia is not benefitting from this "special relationship" in the long run, and that China could even annex it (partly) in its search for Lebensraum.

Thank you for this article. It is astounding how obvious this all is when you point it out. I was clinging to some hope re Castro though even if I don't trust Putin at all and believe him to be one of those most definitely playing the game.

I live in the countryside and I grow some of my food – nowhere near enough though. What can we do though? Do you have any suggestions or solutions? There is nowhere to hide so will have to dig ourselves in. Hoping to hear from you – something positive please. I do believe all will be well – it is just a question of when!

Hi Terry, thanks for your comment. The Predators have captured all countries, corporations, institutions, banks, media etc. That's where they are strong: according to Sun Tzu you should not attack them frontally on their strong side. But resistance is necessary, as we learned during Covid, or earlier er on.

Our strong side ca be found by rediscovering our spiritual or even religious roots. Once we know we can move mountains, we should concentrate on making other people aware.

Hi Terri. It is very scary and weird, isn't it. I think one answer is we need to create local economies to strengthen our own bonds. I watched this heartening video from Local Futures that cheered me up a bit: <https://youtu.be/OJBWvUEZ-50?si=OP27kydw7FPL1MFN>
